// =====
// NIBRAS ENGLISH – CONTENT EXPANSION (FINAL, dedup-clean)
// =====
// Adds to (does NOT replace) the existing content:
//   • 24 new vocab words per category (96 new total)
//     → final per category: 8 existing + 24 new = 32 words
//     → final site total: 128 vocabulary words
//   • 38 new idioms
//     → final pool: 12 existing + 38 new = 50 idioms
//
// I have verified all 96 new words against the existing 32 – there are
// ZERO duplicates and ZERO near-duplicates (e.g., "stretch" vs "stretches"
// removed, "dumbbell" vs "dumbbells" removed, etc.)
//
// INSTRUCTIONS FOR z.ai:
//   1. For each interest category in the `interests` array, APPEND the
//       matching new vocab list AFTER the existing 8 vocab items.
//       DO NOT delete or modify any existing item.
//   2. APPEND the new idioms array to the EXISTING `allIdioms` array.
//       DO NOT delete or modify any existing item.
//   3. DO NOT generate, modify, or "improve" any vocab examples or idiom
//       examples – paste them verbatim.
//   4. Do NOT add any content not in this file.
